

How do scientists use footprints to study bears?

# Which Brown Bears Visited This River?

The river is a popular spot for brown bears in Katmai National Park! Use the back footprints from the brown bear Identification Guide to decide which prints belong to each bear.

Based on my observations, these brown bear footprints belong to:

1. \_\_\_\_\_ 2. \_\_\_\_\_

3. \_\_\_\_\_ 4. \_\_\_\_\_

Why do you think bears are visiting this river?

Do you think this area of the river should be protected? Why or why not?

Use a field guide to look for and identify animal footprints in your backyard or near your school!
