Mickey Ears Visor

WHAT YOU'LL NEED

- 3 peel and stick foam sheets (black, red and yellow)
- Pencil
- Elastic string
- Scissors

HOW TO MAKE IT

1 Use a pencil to trace the visor's shape (similar to a moon) on the yellow and red foam sheets. Use scissors to cut the red and yellow foam.

2 Use a pencil to poke holes in each corner of the visor shape for the elastic string to pass through it when it's ready.

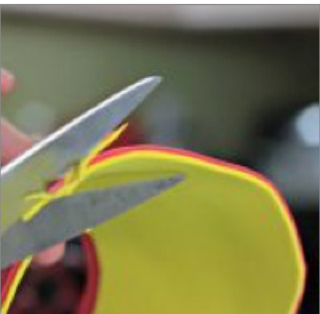

3 Cut out 4 circles of about 3 inches in diameter for the ears, as well as 4 small rectangles, as shown in the next picture.

4 Remove the paper on the back of the ears. And use the small rectangles to anchor the ears to the visor.

5 Stick two of the circles together, with a small rectangle poking out from in between them to use it as an anchor to the visor.

6 Stick together the two visor shapes (yellow and red foam) and cut out the excess foam, if any.

7 Use the elastic string to finish the back of the visor, by letting it pass through the holes and making a tight knot. And voilà, a cute Mickey Mouse craft that is also useful!
